

“Meet the Artist” Antoinette von Grone

MCAA is pleased to present Antoinette von Grone for the second in a series of “Meet the Artist” presentations at the Grace Hudson Museum. She will talk about how she became a fine art artist through or despite studying textile and fashion design and how she ended up in Boonville. She will speak about the different styles and subjects and techniques in which she works and what the background is for those choices. She plans on bringing a few actual paintings as well as her portfolio for viewing. She will also play a video after the lecture for those who are interested in her animal rights advocacy activities and how they weave into her current paintings.
